<b>Zoo Mesh Service</b>

**100% Hand Woven, 304/316 stainless steel material, Wire Cables X-cross Netting**

**Strong, Flexible, Soft, Never Rust, Useful Life Over 30 Years**

**Over 20 Years Rich Experience, Technology, Professional Manufacture**

**▼ Details about the stainless steel wire rope mesh used for Deer cage fence mesh, Zebra barrier netting, Giraffe netting mesh, Zoo deer enclosure fence netting mesh**

**Liulin zoo mesh factory** established in 1996 in China, have 21 years history, it's a rich experience, advanced technology, professional manufacture. The main products is **Stainless steel wire rope hand woven mesh, steel wire cable braid netting**, specialized used for zoo mesh, zoo fencing, zoo netting, zoo enclosure.

The wire rope netting mesh can be used for **kinds of Deer Cage Fence, zoo zebra enclosure netting, giraffe barrier mesh, Zebra barrier netting, Giraffe netting mesh, Zoo Deer netting, Deer wire rope netting mesh, stainless steel Deer netting, deer cage metal protection netting, deer enclosure fence netting mesh, Vegetarian enclosure mesh, deer fence, deer exhibit mesh, deer cages, deer fence mesh, deer enclosure netting, zoo deer fencing, zoo animal netting, and so on.**

**The stainless steel wire rope woven mesh for zoo deer enclosure fence netting mesh, zebra barrier netting have lots of advantages:**

- ◆ Deer Cage Fence are pliable, transparent grid structures made of stainless steel rope are multifunctional and durable.
- ◆ Stainless steel rope netting can create a totally enclosed space for the deers, zebra, giraffe, make it highly closed to the nature.
- ◆ Zoo zebra netting are more beautiful and stronger than the chicken wire and non-metal mesh.
- ◆ Giraffe barrier mesh are premium-quality, never rusted, no need to maintenance for more than 30 years.
- ◆ Flexible zebra wire rope netting incredibly well suited for zoo, safari park, bird park, garden, protective, ocean, acrobatics, decorative and the similar environments.
- ◆ Zebra barrier netting are highly compatible with creative contemporary architecture.

**▼ Application effect pictures about Zoo deer fencing mesh, Zebra barrier enclosure netting, giraffe netting mesh**

△ The **zoo deer enclosure fence netting mesh** is a main application of the wire rope netting mesh, which are **hand-woven** by high quality AISI 304/316 stainless steel multistrand wire ropes, using the wire rope diameter of 1.6mm, 2.0mm, 2.4mm. The mesh aperture have 38mm - 120mm many size. [More Deer fencing mesh Specification details please check the \*\*Next Tabs\*\*.](#)

Zebra cage fence, Giraffe fence netting, Bison enclosure mesh, Buffalo fence, ox fence protection mesh, camel fence, llama fence net, antelope fence, hand woven guanaco fence safety mesh, hippopotamus fence, horse enclosure fence, lamb fence protective mesh, pig cage fence enclosure, pony fence netting, reindeer cage metal fence, rhinoceros fence mesh, sheep fence, water buffalo fence, yak enclosure netting, donkey fence, etc

△ The above pics are the deer fence project we did, it's a long fencing used for caging deer, zebra, and other herbivore animals. You can use the stainless steel cable netting mesh to make a beautiful Deer cage fence, Zebra fence mesh, Giraffe fence netting, deer exhibit protection mesh as you want, so we call the mesh said zoo mesh, zoo fencing, zoo netting, zoo enclosure, and so on.

△ As the deer animal fence netting mesh in zoos or parks, the safety is very important. Used this kind of stainless steel zoo deer enclosure

fence netting mesh, you are no need to worry the animals will destroy the netting and out of the cage, and not worry the wind and snow break the animal fencing. **We tested the Min.breaking load, the 2.4mm wire rope is 4080 Newtons.** So the zoo mesh will wholly protect the visitors and animals security. After all, what is more important than security, right?

△ The above pics are giraffe cage netting fence case in Hangzhou zoo, the giraffe fencing are not very high, but good sight. The wire rope netting mesh is more stronger, safety, durable, flexible, and beautiful than the traditional mesh, no need the onerous facilities, you will make a free shape animal cage netting. Planting some rattan, will make a green protective screen, this also a landscape.

## **ZooMesh Details**

### **1. Stainless steel wire rope Zoo Mesh, zoo fencing, zoo netting's Material**

Liulin Zoomesh use AISI 304/316 stainless steel **multistrand wire ropes**, the materials meet the requirements of **International Standards**, can be used more than **30 years**.

**AISI304** Stainless steel apply to most of the area, the **316** material mainly used for wet environment, like seaside.

## 2. Stainless steel wire ropes

**Wire rope diameter:** 1.2mm, 1.6mm, 2.0mm, 2.4mm, 3.2mm

**Wire rope diameter:** 3/64", 1/16", 5/64", 3/32", 1/8"

**Min. breaking load (KN):** 3.2mm – 7.32; 2.4mm – 4.08; 2.0mm – 3.10; 1.6mm – 2.12; 1.2mm – 1.19

**Wire rope construction:** 3.2mm – 7x19; all others – 7x7

△ Stainless steel Zoo mesh use the high quality **multistrand** wire ropes of 304 or 316 material

## 3. Wire rope netting mesh Technology:

Liulin zoo mesh is a factory over 20 years, which have **rich experience, technology**, it's a **professional manufacture** for stainless steel rope mesh in zoo animal cage fence, bird netting, animal enclosure, animal protective fence, animal separative fence, zoo animal safety net, animal security fence, and so on.

The **stainless steel rope woven mesh** are **100% hand-woven** from the stainless steel wire ropes, the nodes appears the **x-cross** form

and has the fixed position, will not be shifted.

△ We have three types of stainless steel rope mesh, the woven mesh is our main products.

**Woven mesh:** The wire rope woven mesh is our main products, the order quantity are 90% of total order and production. The wire rope woven mesh are widely used in many place you want.

**Decorative mesh:** Add decorative beads when woven the zoo mesh will become the decorative mesh, this kind of decorative mesh often used in decoration place.

**Ferruled mesh:** Using ferrules weldless connect the wire ropes can make the ferruled mesh, also used in decoration place usually.

#### 4. Wire rope Zoo mesh Appearance

##### ① Stainless steel rope netting mesh aperture:

The wire rope netting mesh's holes are diamond, in natural state, the zoo mesh panels are contracted, during the installation, it should be stretched until each angle reach **90 degree**, so that the zoo mesh panel could be installed successfully, this is the maximum use of state. Of course, there are customers to pursue more beautiful looking, stretching the mesh angle only to **60 degrees**, which is also workable, **if you are about to purchase the mesh in 60 degrees mesh, please specify before your placing of the order.**

##### ② The color of the stainless steel rope woven mesh

Usually, the zoo netting mesh is in the plain **stainless steel natural color**. But, in order to meet some needs, some customers will have the zoo mesh in **black color**, but now, the workmanship of " black oxide " in China is not very good and stable. But we are still trying to solve this problem, not only the black oxide color, but also the **bronze color**, once we done that, we will update the relative information on the web page.

△ stainless steel wire woven mesh appearance beautiful and gentle

### ③ Zoo mesh panel surface and shape

There are no any rags on the smooth surface, so the wire rope netting mesh could protect the animal skin and feather of the birds.

The stainless steel rope mesh can only be produced in **rectangular shape**. If you need special shape, the only way is to cut off the excess part after the installing, say, the four edges of the whole mesh has been fixed. Very important, please note do not trim the zoo mesh before the installation.

### ④ The edge of the wire rope netting mesh

The edge of the wire rope mesh connected by the ferrules, will **not loose**.

Furthermore, the ferrules in the edge of wire rope netting mesh could have an " eyes ", which are of the higher material and workmanship cost, but could supply us an easier way to install the **zoo mesh**, and lookis more bueautiful. If you need that, please contact us so that we could calculate the extra cost of the ferrules with such " **eyes ferrules** " .

△ X-corsed hand woven mesh; the edge of the wire rope netting mesh

⑤ **Flexible and soft performance**

The stainless steel wire rope woven mesh are with the soft touching, can be **stretched, folded, rolled and packed naturally**.

△ Stretched, folded, rolled and packed the stainless steel rope woven mesh

## 5. Other application of stainless steel cable netting

### Cylindrical cage netting mesh, animal channel fencing mesh, animal tunnel cage netting

(1) **The tubular tunnel fence.** As the flexibility of stainless steel wire rope woven mesh, make it can be used for **tunnel and channel fence of the animal cages**, We can directly woven into a tubular style, but not the later connection. Mainly applied for the **monkey cage tunnel fence, tiger cages channel enclosure** and etc. This way could give more fun to the animals, but not only a beautiful style. Of course, which could also be applied for the connection of two non-adjacent cages.

### Zoo mesh for Architectural & Decoration

(2) stadium fence, sports fencing, decoration mesh, bridges protective fence and so on

In addition to animal fencing & enclosure & netting, bird cage net, the wire cable mesh can also be used for exterior decoration mesh, engineering protection fence, bridge guardrail fencing, staircase handrail net, stadium fence, acrobatics fence, all kinds of security protection fence, municipal construction mesh, etc. numerous fields.
